How to Join ANN SI

ANNSI from dream into actions

African youth nurses as novice nurses and students together can play important active role and support in achieving African progress specially Africa agenda 2063.

Africa is the world's second largest and second most-populous continent, The Health of the People is the first report to focus on the health of the 738 million people living in the African Region of the World Health Organization. While acknowledging that Africa confronts the world's most dramatic public health crisis, the report offers hope that over time the region can address the health challenges it faces, given sufficient international support. Nursing is a profession within the health care sector focused on the care of individuals, families, and communities so they may attain, maintain, or recover optimal health and quality of life. Nurses may be differentiated from other health care providers by their approach to patient care, training, and scope of practice. Nurses practice in many specialties with differing levels

of prescription authority

ANNSI “African Novice Nurses and Students Initiative” is the first active regional initiative aim to combine all African novice nurses and students together as volunteers for better Africa future through nursing.

ANNSI already start with very important health awareness campaign against FGM by African novice nurses and students leaders represent 7 African countries “Egypt, Ethiopia, Kenya, Nigeria, Rwanda, South Africa and Sudan” in Fall 2017 and spread the awareness with their local languages, as effective African nursing contribution for better health all over Africa through ANNSI.

THE AFRICA WE WANT

Africa Agenda 2063

African youth nursing roles

Africa Agenda 2063 It is a strategic framework for the socio-economic transformation of the continent over the next 50 years. It builds on, and seeks to accelerate the implementation of past and existing continental initiatives for growth and sustainable development.

Some of the past and current initiatives it builds on include: the Lagos Plan of Action, The Abuja Treaty, The Minimum Integration Programme, the Programme for Infrastructural Development in Africa (PIDA), the Comprehensive Africa Agricultural Development Programme (CAADP), The New partnership for Africa's Development (NEPAD), Regional Plans and Programmes and National Plans. It is also built on national, regional, continental best practices in its formulation.

The guiding vision for Agenda 2063 is the AU Vision of “An integrated, prosperous and peaceful Africa, driven by its own citizens and representing a dynamic force in international arena”

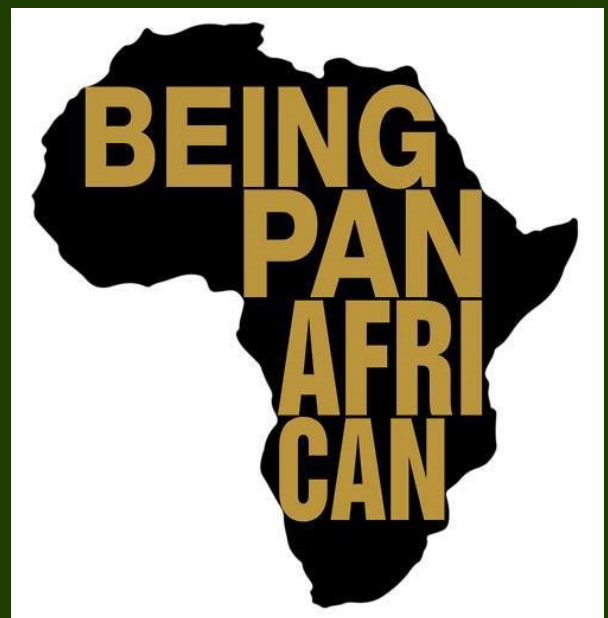

The seven African Aspirations were derived through a consultative process with the African Citizenry. These are:

- A Prosperous Africa, based on inclusive growth and sustainable development
- An integrated continent, politically united, based on the ideals of Pan Africanism and the vision of Africa's Renaissance
- An Africa of good governance, democracy, respect for human rights, justice and the rule of law
- A Peaceful and Secure Africa
- Africa with a strong cultural identity, common heritage, values and ethics

- An Africa whose development is people driven, relying on the potential offered by people, especially its women and youth and caring for children
- An Africa as a strong, united, resilient and influential global player and partner

ANNSI “African Novice Nurses and Students Initiative” as the first regional initiative aim to combine all African novice nurses and students together as volunteers for better Africa future through nursing and approve that African youth nurses can do more for better Africa.

ANNSI concern with capacity building and acquiring novice nurses and students' knowledge, skills and attitude that help them to be active player in achieving Africa agenda 2063.

ANNSI remember you World AIDS Day in 1st Dec

World AIDS Day takes place on the 1st December each year. It's an opportunity for people worldwide to unite in the fight against HIV, to show support for people living with HIV, and to commemorate those who have died from an AIDS-related illness.

AIDS is not a virus but a set of symptoms (or syndrome) caused by the HIV virus. A person is said to have AIDS when their immune system is too weak to fight off certain defining symptoms. This is the last stage of HIV, very advanced, and if left untreated will lead to death.

A person is said to have AIDS when their immune system is too weak to fight off certain defining symptoms and illnesses. This is the last stage of HIV, very advanced, and if left untreated will lead to death.

Basic facts about AIDS

- AIDS stands for acquired immunodeficiency syndrome.
- AIDS is also referred to as advanced HIV infection or late-stage HIV.
- AIDS is a set of symptoms and illnesses that develop as a result of advanced HIV infection which has destroyed the immune system.
- Treatment for HIV means that more people are staying well, with fewer people developing AIDS.

WHO and UNFCCC collaboration

WHO in collaboration with UNFCCC united nations framework convention on climate change launched a special initiative to protect people living in Small Island Developing States from the health impacts of climate change.

Climate change is not a political argument It is an everyday reality", said Director-General Tedros Adhanom Ghebreyesus

People living in small islands are particularly vulnerable to the health consequences of climate change

ICN 2018 theme

ICN international council of nurses announce that ICN has chosen the theme "Nurses A Voice to Lead – Health is a Human right" for International Nurses Day 2018

NURSES

A VOICE TO LEAD

HEALTH IS A HUMAN RIGHT

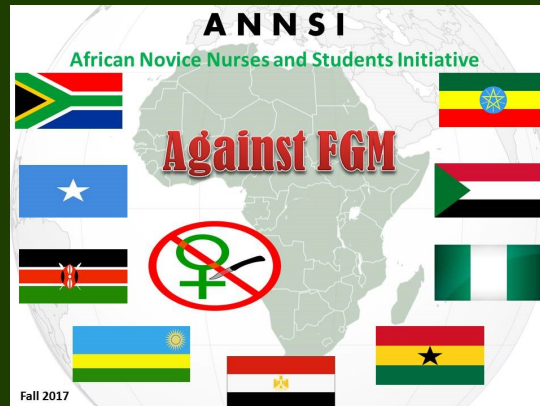

ANNSI against FGM

There is no doubt that the better future of African health needs more efforts, and the nursing profession carries a noble, purposive message to face the wrong health habits inherent in society, as it has a great impact on health care system, so we have to think and work hand in hand together as African novice nurses and students leaders to make our African dream come true. - One of these severely wrong inherent health habits is FGM " Female Genital Mutilation ". -Female genital mutilation FGM is a human rights violation, torture and an extreme form of violence and discrimination against girls and women its involves removing and damaging external female genitalia for nonmedical reasons -This procedure has lived in Africa for decades and is still spreading in and out like a virus under cover of social, traditional and religion justification in absent of fact and truth element even behind FGM existences in the first place .

-The harmful practice of female genital mutilation (FGM), the cutting of the female genital organs for ritual rites dating back to pre-biblical times, is being currently practiced dominantly in the whole 52 African countries, parts of the Middle East, pocket areas in other parts of the world and among immigrant population in the developed world. -

It is estimated that over 200 million infants and girl children are annually mutilated in the name of tradition and religious requirements. -This practice is detrimental to the health and wellbeing of women and girl-children. -At the international, regional and local levels various activities are being undertaken to address the issue as well as to prevent and eliminate it. -There remains a lot to be done to identify the root causes and justifications to devise appropriate.

Ms.Samah Elsayed SCOPH officer

from Egypt, **Ms.Nawal Omar** from Ethiopia and **Mr.Mohamed Hamed** from Sudan are the general coordinator of ANNSI FGM campaign tell us ore about the campaign objectives:

ANNSI FGM campaign objectives:

- 1- Creating awareness and appreciation of the various political, Economical, social and traditional problems of FGM face in different societies.
- 2- Creating and promoting the awareness level among different cultures and societies about the effects of FGM.
- 3- Assisting and providing consultancy in the integration of communities in Promotion of good and beneficial cultures and traditions.
- 4- High lights the harmful traditional practices affecting the health of women.
- 5- Provide information and resource material to students, researchers and media people.
- 6- Provide online consultation to FGM victims.
- 7- Prepare an FGM training aid kit.
- 8- Strengthen communication and cooperation with FGM European network.

WHSS2017

7TH WORLD HEALTHCARE STUDENTS SYMPOSIUM
KIGALI, RWANDA-NOVEMBER 23-27, 2017

Meet ANNSI in WHSS 2017 Rwanda, Kigali

ANNSI leaders announce that they will meet together in Kigali, Rwanda from 23 Nov to 27 Nov 2017 and also join WHSS .

WHSS stands for World healthcare student symposium. Is a biennial symposium. This year, through Rwanda Pharmaceutical Students' Association, Rwanda will be the first sub-Saharan country to host the World Healthcare Students' Symposium which gathers healthcare students and professionals from across the World to network, discuss and find solutions to the most pressing global health challenges.

The theme for this year's conference is "Towards the SDGs Agenda 2030: The role of a multidisciplinary approach in Healthcare"
