ANN SI

Strategic orientation 2022

1. Nursing education and research

- Implement Nursing specialties activities
- Nursing Research updates
- Publish scientific articles

2. Public health and Awareness

- International health days celebration
- Health awareness campaigns
- Enhance Nurses role as health educator

3. Exchange program

- Implement national, regional and international exchange program

4. Training:

A. Soft skill

- Provide updated knowledge, skills and attitudes soft skills training

B. Leadership and management.

- Provide updated knowledge, skills and attitudes Leadership and m management Training
- Encourage managerial and leadership position
- Facilitate managerial progress and promotion

C. Nursing practice

- Provide training related to nursing practices in fundamental and specialized nursing skills.
- Improve the quantity, quality, and relevance of nurses and midwives to address essential population-based health care needs, including HIV and other life threatening conditions
- Identify, evaluate, and disseminate innovative human resource for health models and practices that are generalizable for regional, and national scale-up of nursing and midwifery education
- Build local and regional partnerships to provide technical and capacity building support for nursing and midwifery policy, regulatory and faculty development, curricula reform, continuing professional development and retention, and high impact nursing leadership

6. Global nursing image and advocacy:

For the Public:

- Educate the public on the vast quantity of professional roles in nursing, and how those roles affect all individuals in their everyday lives.

Collaborate with nurses and other medical associations that are also promoting a positive image of nursing or recruiting future nurses.

- Encourage patients to share their experiences, both positive and negative, that deal with the nursing profession, to help the nursing community work toward correcting any problems and supporting any accomplishments made by individuals and the profession.

For novice nurses and Students:

- Work with the recruitment committees in local and country chapters to ensure that education on the numerous job opportunities in nursing is provided to those interested in nursing school.
- Encourage and assist country in forming their own Image of Nursing Committees, as well as planning and implementing events that qualify them for the Image Award.
- Encourage students and novice to help counteract negative stereotypes in nursing not by reacting to those stereotypes, rather by spreading a positive image in their clinical and everyday lives.
- Try to collaborate with local and state associations for professional nurses when seeking advice for and planning Image of Nursing events. Such individuals are amazing examples of the type of nurses that reflect a positive image, and can really demonstrate the level of impact that can be made by individual efforts.

 **advocacy**

7. Nursing policy and development:

- Design regional and national policy for nursing practice and different issues
- Analyze legislative policy and regulatory issues related to nursing and healthcare and identify a plan to address these issues;
- Practice collaboration among peers. Master the skills needed to set an agenda and to run it
